

Starboard is all about Innovation and Quality.

Our Range of Technical garments are a cool collection of visionary performance water wear that will provide the rider with that extra edge of functionality.

Starboard technical apparel is naturally inspired by water, wind and waves.

SUPing in the cold will never be the same.

## ABOUT OUR TECHNOLOGY

The focus has been to design and build a layering system that is lightweight and flexible, while keeping your body at its optimum temperature during performance.

This is achieved using materials such as the 100% waterproof Clima-Core, which is adaptable to varying weather conditions, breathable and lightweight. In addition to this, thermal fabrics will trap warm air and wick moisture away from the body.

In combination with respective base and mid layers, the system keeps you warm and comfortable in the coldest of climates, or individually in the milder conditions.

proof, breathable membrane, which

reacts to changing body temperatures whilst providing protection from external weather conditions. Depending on the level of activity and climate, the fabric alows for increased breathability or heat retention respectively.

#### **Features**

- ▶ 100% Waterproof and Windproof
- ► Temperature Regulating
- > Breathable

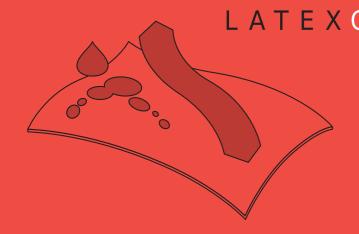

Our Zips are 100% heavy duty zippers from YKK. AQUASEAL® zippers are 100%

waterproof, smoother and more flexible, offer optimum protection with a film-coated tape and an innovative zipper element mechanism. The AquaGuard® series are polyurethane laminated, yet water repellent with enhanced water resistance.

#### **Features**

▶ 100% Waterproof

LATEXCUFFS Latex cuffs at wrist, ankles and neck give 100% density to the body.

> Seamtite<sup>™</sup> suit seals have an enviable reputation for performance and comfort.

#### **Features**

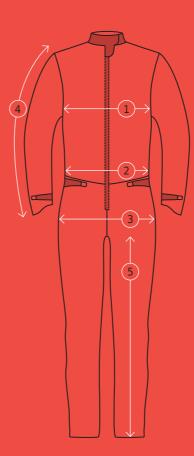

▶ 100% Waterproof

# MEN'S HEAVY DUTY SUP SUIT

Made from Clima-Core breathable and waterproof fabric, reinforced at high abrasion points with a tough durable cordura material. Latex seals on the wrists, ankle and neck will keep you dry, waterproof zip around the neck for maximum comfort to get in and out. The anatomical panel layout allows full vertical and horizontal stretch at stress points situated on the back and side panels of the torso as well as the crotch. The fabric has a slight stretch for a slim fit and 100% paddling performance. The Starboard Heavy Duty SUP Suit is designed with the endurance explorer in mind; extreme SUPing will never be the same.

# TOP FEATURES & HIGHLIGHTS

- ► Clima-Core Technology: Breathable & Waterproof
- ▶ Non-flapping and highly flexible material
- ► Anatomical paddle panels
- ▶ 100% waterproof zip around the neck
- ▶ Slim fitting
- ▶ Waterproof key garage
- ► Adjustable latex cuffs at wrist, ankles and neck
- ► Abrasion resistant panels at shin, knee and backside
- ► Reflective prints for visibility in diffuse conditions

#### MATERIAL

▶ Outer shell: 85% Polyamide, 15% Elastane

▶ Membrane: 100% Polyeurethane

▶ Lining: 100% Polyester

▶ Weight: 195gsm

# MEN'S ALL STAR SUP SUIT

Made from Clima-Core breathable and waterproof fabric with latex seals on the wrists and ankle cuffs, it includes a waterproof front zip with a soft neoprene neck seal. The anatomical panel layout allows full vertical and horizontal stretch at stress points situated on the back and side panels of the torso as well as the crotch. The fabric has a slight stretch for a slim fit and 100% paddling performance. The Starboard All Star SUP Suit is designed with the racer in mind; *SUPing in the cold will never be the same*.

# TOP FEATURES & HIGHLIGHTS

- ► Clima-Core Technology: Breathable & Waterproof
- ▶ Non-flapping and highly flexible material
- ► Anatomical paddle panels
- ▶ 100% waterproof zip
- ▶ Slim fitting
- ▶ Comfortable neoprene neck seal
- ▶ Waterproof key garage
- ► Adjustable latex ankle and wrist cluffs
- ► Reflective prints for visibility in diffuse conditions

- ▶ Outer shell: 85% Polyamide, 15% Elastane
- ▶ Membrane: 100% Polyeurethane
- ▶ Lining: 100% Polyester
- ▶ Weight: 195gsm

# MEN'S ELEMENT SUP SUIT

The Element Dry Suit is 100% waterproof and unlike the SUP suit, is 100% sealed. The innovative seal at the neck and latex cuffs will keep you dry even if you fall in the water. The breathable yet windproof Clima-Core fabric means that you are protected from all the elements and will be warm in frigid climates. As the fabric has superior stretch, the suit is designed to have a slim fit, allowing you to SUP in complete comfort and style. The combination with the fully sealed jacket gives the suit a *unique two piece look.* 

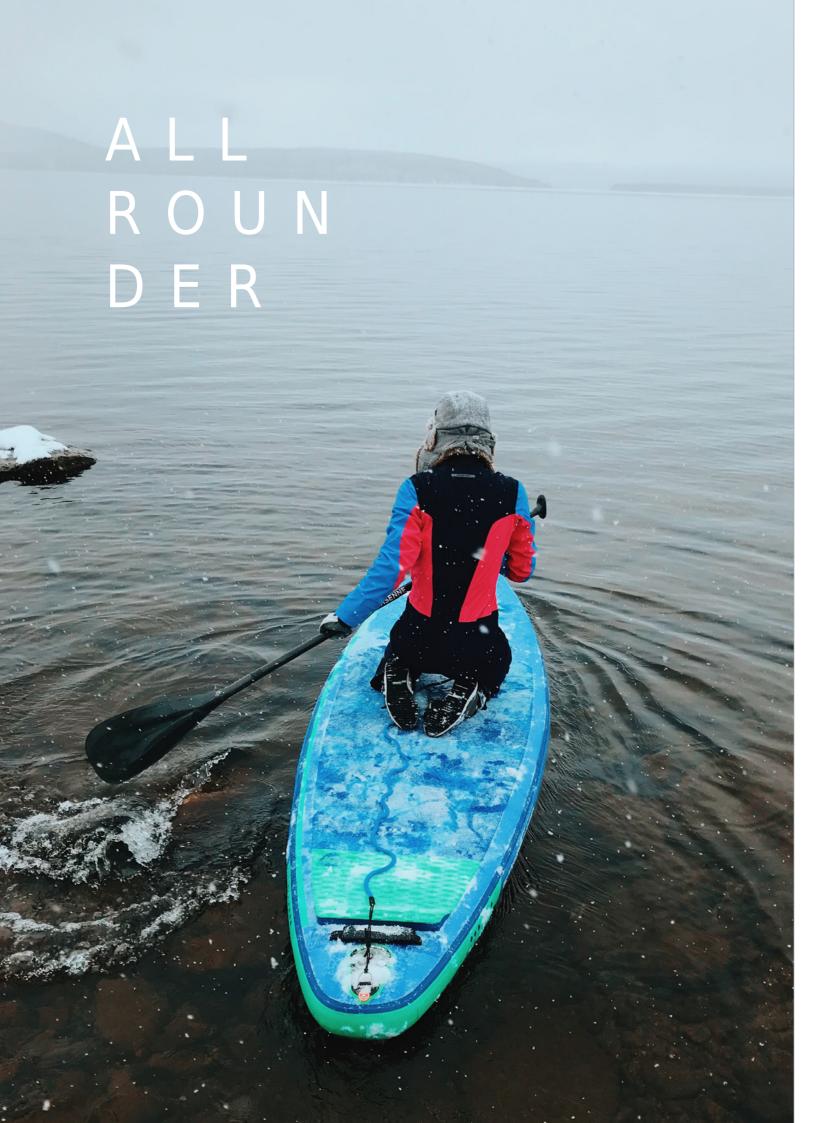

# TOP FEATURES & HIGHLIGHTS

- ► Clima-Core Technology: Breathable & Waterproof
- ▶ Non-flapping and highly flexible material

# THE CONCEPT OF STARBOARD SUP SUITS Q & A

# What was the idea and concept behind the SUP Suit? What sparked the idea to develop this product?

The idea basically was to extend the SUP season and make it an all-year-around-sport, also in areas with snow covered mountains and crystal clear, but freezing cold waters. After we saw, that neoprene suits did not fulfill our requirements, we thought about how to merge snow- with water-garments to fit the needs of stand up paddling.

# The Suit is made from a revolutionary material called Clima-Core, could you take us through the technology?

Clima-Core is a 3 layer technology, where we are using ultra stretchy outer fabrics bonded with a waterproof but breathable membrane in the middle and a soft and comfortable lining inside. This fabric gives us the required freedom of movement, as it stretches in every direction, keeps us dry from outside as it is 100% waterproof, yet breathable to transport the moist off the body.

# What makes this suit different to others on the market?

For Stand Up Paddling freedom of movement is key, thus we did not only rely on the Clima-Core technology, but also developed a new panel layout with special stretch zones alongside the upper body and in the crotch area. In addition we lowered the zipper garage of the waterproof front-zip for increased comfort around the neck and added reflective trims on wrist and ankle for safety reasons. Fully sealed seams combined with latex cuffs on arms and legs will keep you dry in any conditions.

# The Suit is designed for Men and Women, is there a difference between the two? Have you catered to both men and women's specific paddling needs?

Almost all suits in the market are more or less made as unisex sizes, which do not really fit women. We took a different approach and developed specific men and women sizing. Even with the extremely stretchy fabrics a women suit needs a different shape, thus we changed the collar construction on the neck, amended the measurements of shoulders and sleeves and gave chest, waist and hips more shape. Beside the fact, that all girls really like the offered color combinations, they were much appreciate the fit and comfort of our ladies suits.

# Would you say the SUP Suit could replace neoprene in Stand Up Paddling?

Neoprene doesn't breath at all and only provides insulation by the thickness of the material, thus is not adaptive to the various conditions you paddle in. For sure these SUP suits can replace neoprene in all flatwater conditions and even in white water. Here we already can see a great perception, as paddlers need to adjust thei equipment to various conditions and temperatures.
